

ARMONY CONTRACT PROJECTS

CONTRACT PROJECTS

OUR PROJECTS
IN THE WORLD

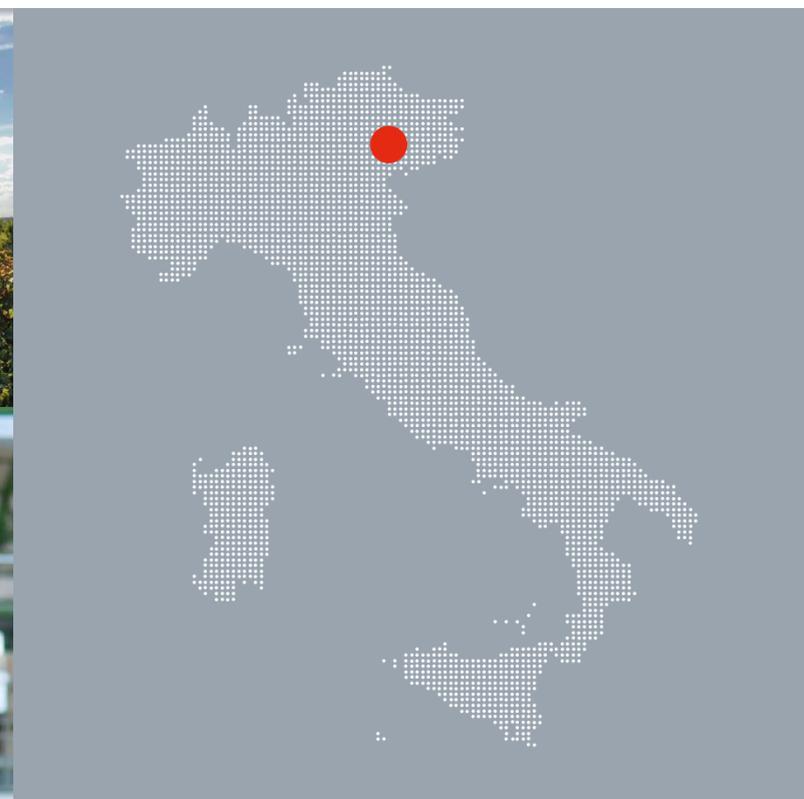

ARMONY IS AN INTERPRETER OF LIFESTYLES
WITHIN THE DOMESTIC SPACE TO GIVE YOU
A HOME WHERE YOU LIVE AS ONE WITH
YOUR KITCHEN AND ITS RITUALS.

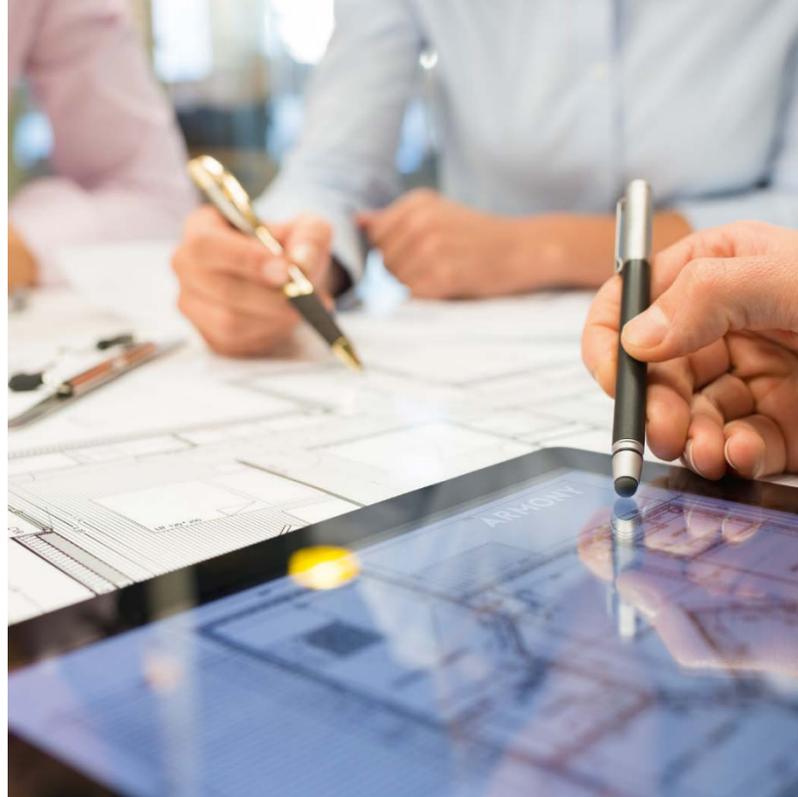

Armony started out in the Treviso province in 1976. From a craft operation it soon became a successful industrial brand. The immediate idea was to create modern functional kitchens that blend in perfectly with home furnishings, enhancing them and providing the final touches.

MADE IN ITALY

Quality is an essential value. This is why we make everything in our own production plant, in a district of furniture excellence in the North East of Italy, working in cooperation with national suppliers whose professionalism and expertise reflect a great tradition.

Versatility, production capacity and logistics at the service of small and large supplies.

Even when you produce in large numbers, standing out in the crowd is absolutely crucial. Every request, even the most outlandish, can find a solution with our step by step system that allows us to industrialise creativity ensuring that each project is truly unique.

DESIGN

Transforming the pleasure of functional and socially important spaces into tangible projects. Giving an additional security to quality: every item has been made to last. Interpreting contemporary lifestyles through formal research. So the designers at the Armony Research and Development Center bring technology and aesthetics together, to express the beauty of Italian kitchens in each and every design.

ARMONY DESIGN CENTER

An area of 1500 square metres where you can enjoy a personal view of what Armony has to offer and feel its in-depth quality, design and functionality. A large display area conceived as a meeting place to accommodate customers, distributors and agents. The entire world of Armony can be found at the Design Center.

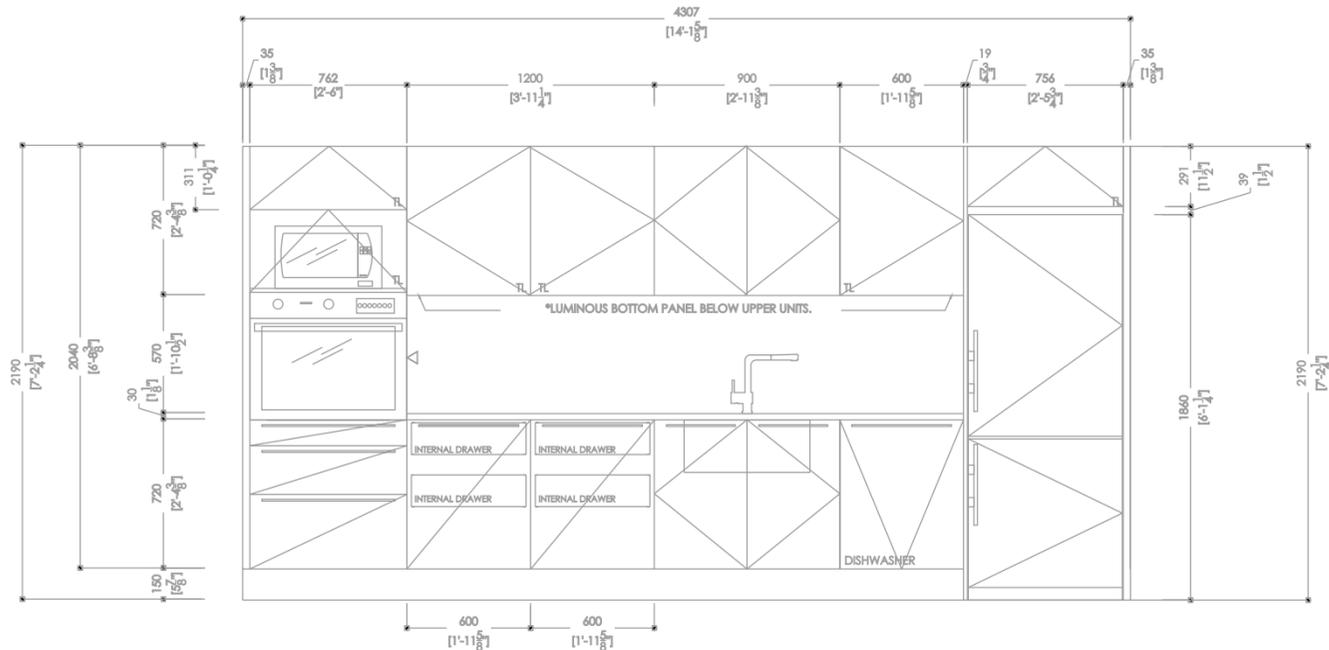

PRODUCTION

Hi-tech professionalism and efficiency. The leader in developments in style and technology. Armony kitchens are manufactured in a state-of-the-art facility where waste is reduced to a minimum and precision takes pride of place and where human skills always make the difference.

In 2000, Armony added an important section dedicated to furniture for major projects to its historic production line of kitchens for the home.

MAJOR PROJECTS
 This new development draws on our experience and technological skills, our specialisation in materials and craftsmanship and our desire to grow and take on new challenges. Furniture designed for public buildings and large businesses, hotels and large residences is all produced in our Mansuè plant, with the quality of the Armony Made in Italy style.

CONTRACT SERVICE PROCESS

Analyses

LISTENING

The first phase is all about our customer's needs: we talk about technology and aesthetics, architecture and lifestyles, numbers and feelings so that they become a reality.

MAKING PROPOSALS

All Armony's production and design expertise is at the customer's service to make the most of, enhance and take full advantage of every choice that is made.

Project

CUSTOMIZATION

The company's versatility allows it to adapt to new situations, by studying innovative solutions, working on prototypes until the final result is achieved and, upon request, by developing new doors and handles, new mechanisms and finishes that aim to amaze both designer and customer alike.

DESIGNING

The design phase is fundamental and that is why we use specific 3D parametric design software and 3D printing technology. We develop in-house computer graphic images to display the design results, affording architects and design firms the checks they require.

SHARING

Drawings, samples, finishes. Every project is conceived through an agile process of communication between the company and suppliers, customers, architects and designers: a real team spirit.

Sales

PROVIDING ESTIMATES

We quickly produce a full quotation, where efficiency always manages to reduce costs, and we keep this as a route to be followed.

The screenshot shows a software interface with a table of data and a 3D rendering of kitchen cabinets. The table has columns for 'MATERIALE', 'DESCRIZIONE', 'QUANTITA', 'UNITA', 'VALORE', 'COSTO', 'MARGINE', 'COSTO UNITARIO', 'VALORE UNITARIO', 'MARGINE UNITARIO', 'COSTO TOTALE', 'VALORE TOTALE', 'MARGINE TOTALE'. The 3D rendering shows a modern kitchen cabinet system with a countertop, sink, and oven.

MANUFACTURING

Technology has never been a problem. Nor the skill of our technicians. We believe in investment - 2 million in the last 5 years in our production department: creativity and ability to adapt our machines to the latest realities.

Shipping & After-sales Service

DELIVERY

Meeting delivery deadlines and requirements is part of every job, even the most complex. Our warehouse, logistics and transport services work in perfect synergy.

ASSISTANCE

A job consignment from Armony means full service, including after-sales assistance. We are always close to our customers in a timely, consistent and effective manner. This is the only way to ensure total all-round satisfaction for the work achieved.

CERTIFICATIONS

Manufacturing means giving a firm undertaking to those who will live in our kitchens, because the first ingredient of ARMONY kitchens is trust. This is why we have certified all our organisational processes according to the international standard UNI EN ISO 9001 and given our customers the opportunity to have a FSC® certified kitchen, i.e. a kitchen where all the wood components come from forests where strict environmental, social and economic standards are applied showing respect for both current and future generations.

Armony was also the first Italian company of kitchen-manufacturers to take an interest in gaining the GREENGUARD trademark that uses the most rigorous scientific criteria to certify standards that help reduce indoor air pollution and the risk of exposure to chemicals, and help create healthier indoor environments.

Our Quality Management System complies with UNI EN ISO 9001

Armony is developing several other projects that are not yet found in our page of references because they are still in progress. Increasingly ambitious projects with significant volumes. This shows the reliability that customers place in Armony.
